

Requirements Analysis – Use Cases

SOFE 2720U Lab 2 Report

CRN: 73378 Group 17

Stanley Watemi 100648403

Michael Carino 100620258

Jose Martinez 100763170

DATE: February 17, 2022

Introduction

In this lab, the group expanded on the requirements list created in the previous lab, creating a diagram for the requirements list that outlined the relation of each set of requirements to a use case scenario. Specifically, the requirements were grouped up showing their relationship with each other and were paired with a use case to express how they relate to the scenario created in the first lab. Furthermore, each use case that was created in a separate diagram are properly described to give additional detail about the scenarios and the requirements for each step of the scenario.

Lab Deliverables

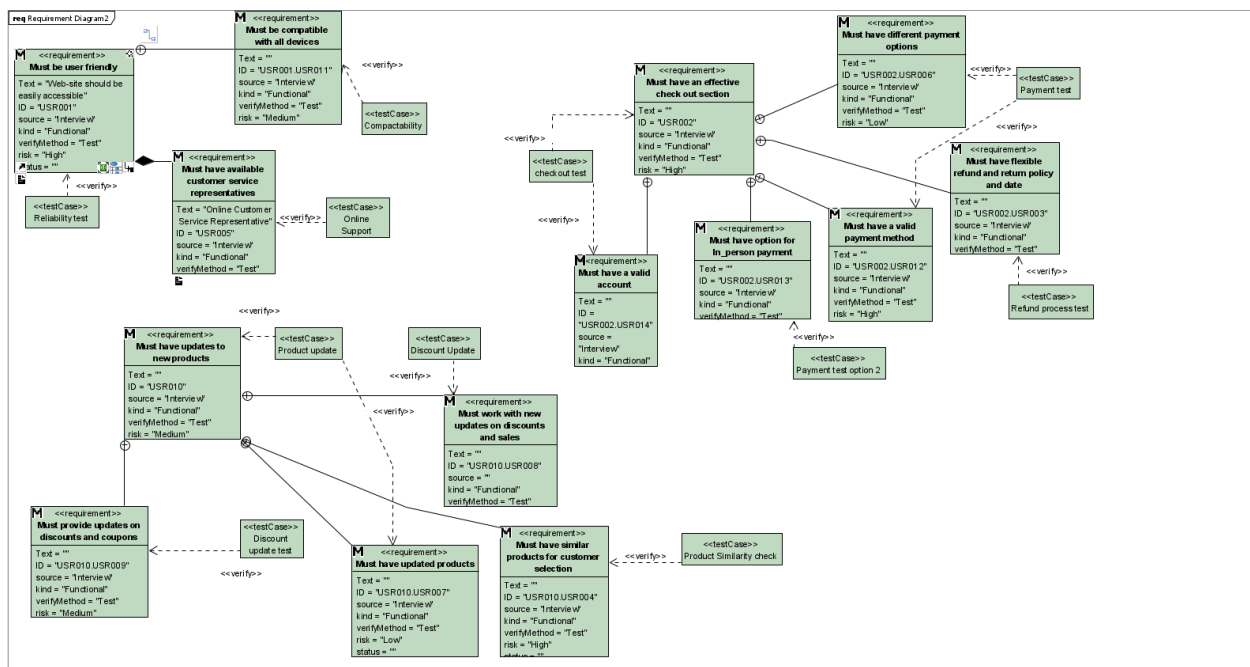

Figure a. Screenshot of requirements diagram (zoom in to read).

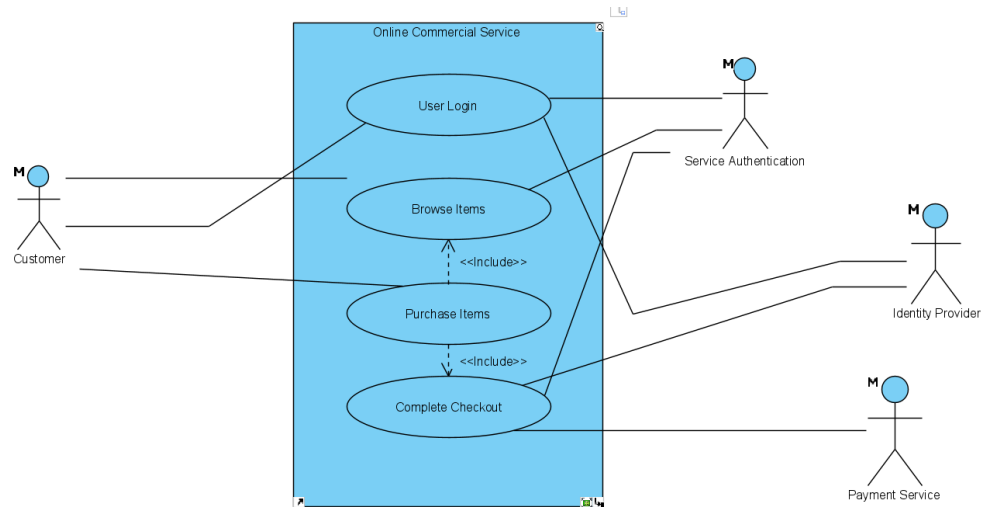

Figure b. Use case system created for this scenario.

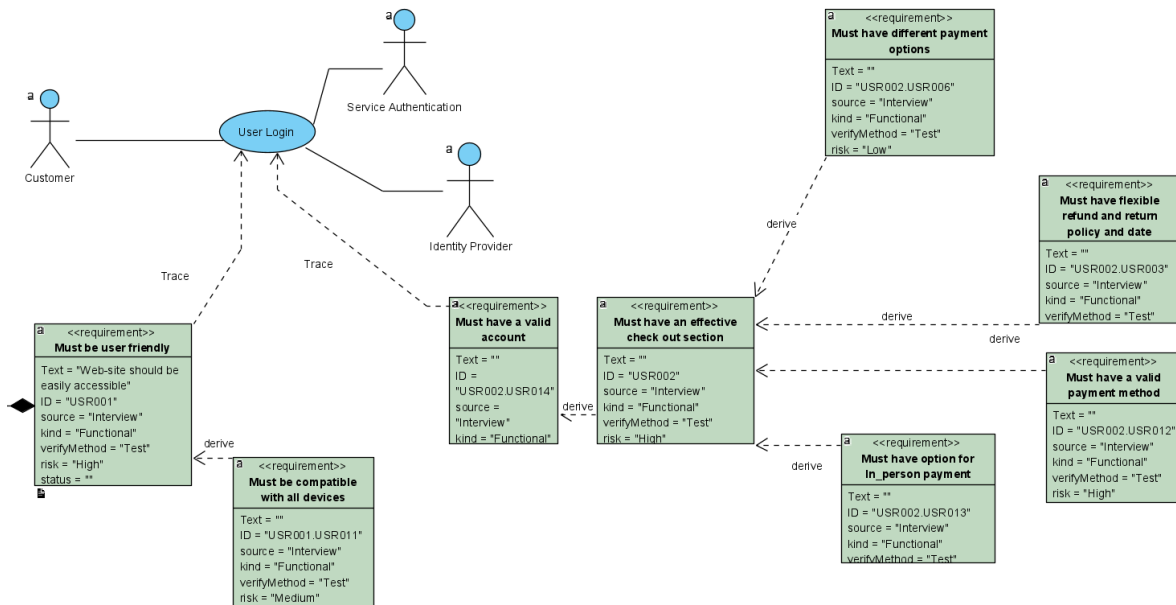

Figure c. Use case 1 with the related requirements.

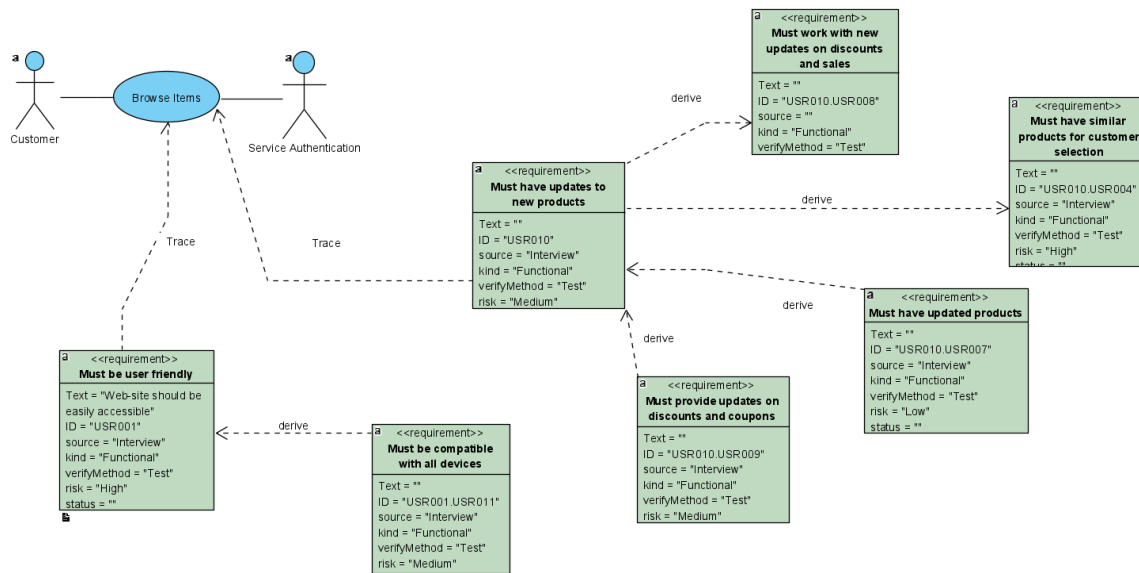

Figure d. Use case 2 with the related requirements.

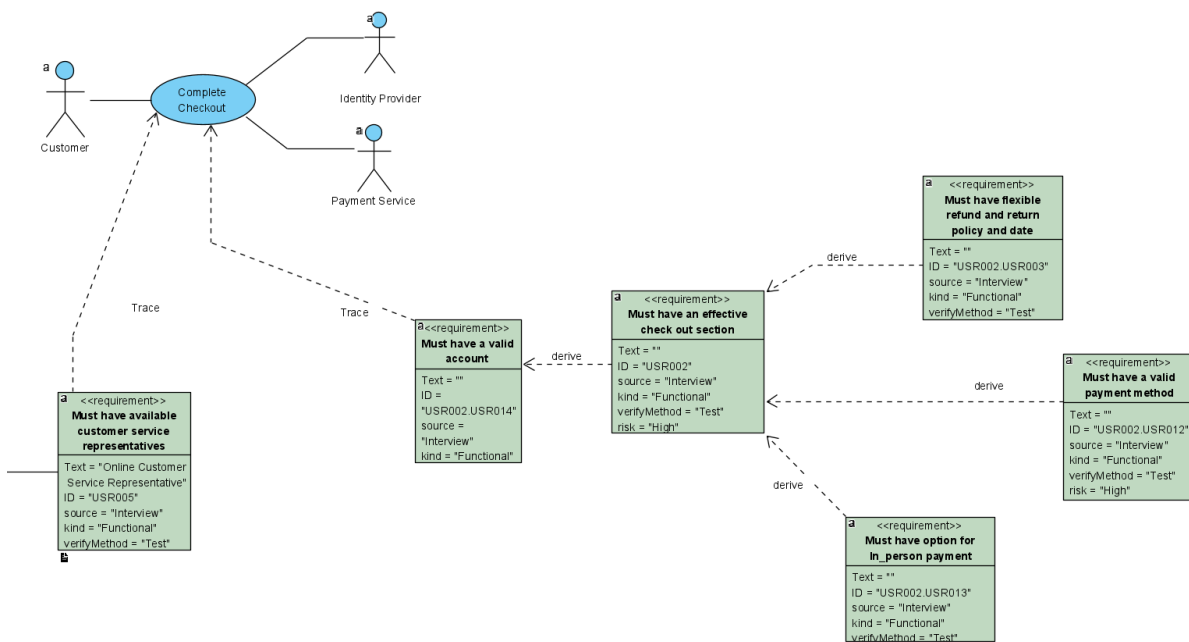

Figure e. Use case 3 with the related requirements.

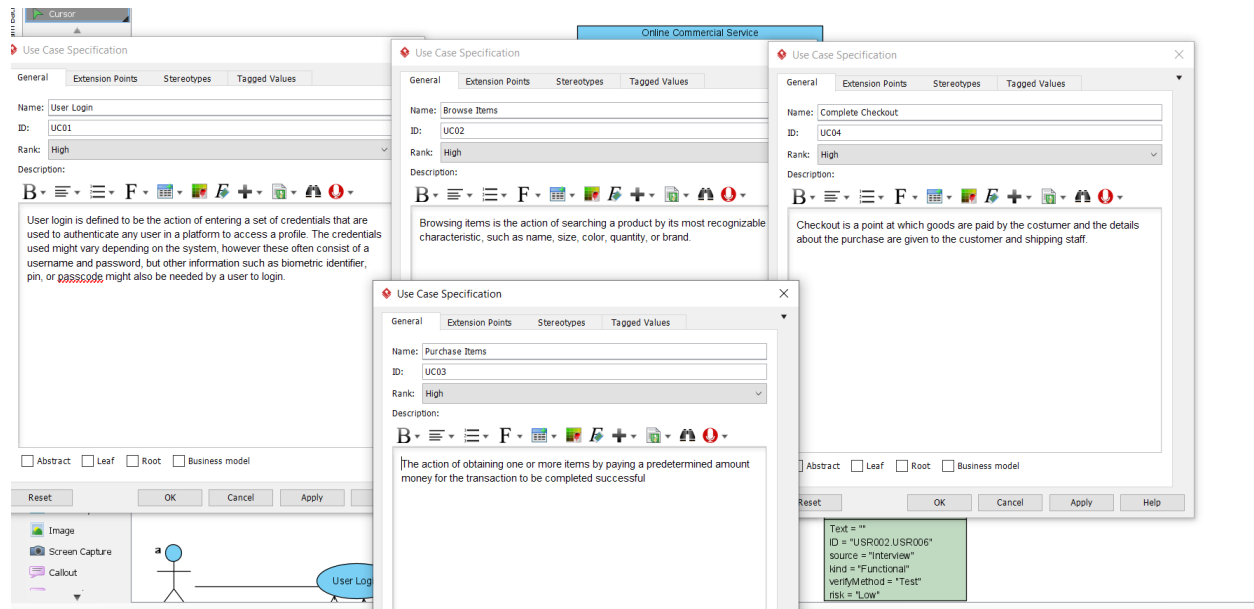

Figure f. Use case descriptions.
